

Why use EKS-Products made of biobased plastics?

**SUSTAINABILITY :**

Biobased plastics help to reduce the usage and dependency on limited fossil resources.

**IMPROVED CARBON FOOTPRINT :**

Plants absorb carbon dioxide from the atmosphere as they grow.

By using these crops to create biobased plastic products, greenhouse gases (CO<sub>2</sub>) are removed from the atmosphere.

**LIFE CYCLE ASSESSMENT :**

Bioplastics contribute to an improved result from LCA.

**ETHICAL LAND MANAGEMENT :**

Crops for industrial use can be grown in poor soil which is unsuited to food crops, potentially avoiding food crop displacement.
